Fuel Pump Specifications:

Passenger Cars.....Pages 2-5
Trucks, Tractors.....Pages 6-10

Repair and Diaphragm

Kit Specifications... Pages 11-23

Bails, Bowls, and

Gaskets..... Page 24

Conversion Chart..... Pages 25-28

Suggested List Price

Schedule..... Pages 29-32

- AC originated the fuel pump twenty-four years ago.
- More than 100,000,000 AC Fuel Pumps have been built.
- More than 90% of all automotive vehicles were factory-equipped with AC's.
- More than 40,000,000 AC Pumps are now in use.
- AC engineers build to but one standard of quality—the highest.

THE ORIGINAL FUEL PUMPS
THERE ARE NONE BETTER

PASSENGER CARS

For models not listed, or if application is not known, determine part number stamped on pump mounting flange and refer to page 25 for Replacement Type No.

For Truck, Tractor or Engine specifications not shown here, ask your wholesaler to check Counter Catalog or see note at top of this page.

TRUCKS and TRACTORS (Cont'd)

For models not listed, or if application is not known, determine part number stamped on pump mounting flange and refer to page 25 for Replacement Type No.

[illegible]

For Truck, Tractor or Engine specifications not shown here, ask your wholesaler to check Counter Catalog or see note at top of this page.

REPAIR and DIAPHRAGM KIT SPECIFICATIONS

HOW TO DETERMINE CORRECT REPAIR KIT

1. Refer to preceding Specification Section and find the Replacement Type Number of the pump listed for the make and model of the vehicle.

NOTE: If the make and model are not known, or are not listed, proceed as follows:

- (a) Determine the 4-digit number stamped on the mounting flange of the pump and convert it to the factory Pump Number using the following formula:

TO DETERMINE FACTORY PUMP NUMBER		EXAMPLES		
Prefix with No.	These 4-Digit Numbers Stamped on Flange	No. Stamped on Pump	Add Prefix	Factory Pump No.
152	1000 to 4000 inclusive	2007	152	1522007
85	5001 to 6400 inclusive	5693	85	855693
153	7001 to 9999 inclusive	8413	153	1538413

- (b) Refer to Conversion Chart, starting on Page 25, and find the Replacement Type Number.

2. Where more than one Factory Pump Number is shown for a Replacement Type Number, and where different kits are specified for these pumps, determine the Factory Pump Number of the pump on the vehicle, following the instructions outlined in (a) above. Use the kits shown for the Factory Pump Number.

FG-10	All combination fuel and vacuum pumps with single center bolt in vacuum cover.																		
FG-11	All pumps with metal fuel covers except those listed under Type FG-9.																		

CONVERSION CHART

FACTORY PUMP NUMBER TO REPLACEMENT TYPE NUMBER

HOW TO CONVERT FACTORY PUMP NUMBER TO REPLACEMENT TYPE NUMBER

This Chart lists complete Factory Pump Numbers numerically and corresponding Replacement Type Numbers. Practically all AC pumps are identified by the last 4-digits of the Factory Pump Number which are stamped on the edge of the pump mounting flange*.

This part of the number is never duplicated.

The complete Factory Pump Number can be determined by using the following formula:

TO DETERMINE FACTORY PUMP NUMBER		EXAMPLES		
Prefix with No.	These 4-Digit Numbers Stamped on Flange	No. Stamped on Pump	Add Prefix	Factory Pump No.
152	1000 to 4000 inclusive	2007	152	1522007
85	5001 to 6400 inclusive	5693	85	855693
153	7001 to 9999 inclusive	8413	153	1538413

*Because of insufficient space on the edge of the mounting flange, some pumps have this 4-digit number stamped on the outside of the diaphragm flange or on the pump body. Others are identified by the complete Factory Pump Number only, which is cast in the pump body under the diaphragm flange.
